Subject: A Good Job

Hi Matt

I would like to thank all of your staff for the care and attention to detail that they have demonstrated with what has been, a very large and complex project.

As a company you have shown that you have the capability and desire to undertake small or large projects and deliver a quality product in a timely manner.

It is a pleasure to work with your guys, who believe in a friendly proactive approach when it comes to assisting with design, manufacturing, testing and installation issues.

Thanks and Regards

Jeff Loder
